

We are hiring!

Datamanager

m/w/d

What you will work on

- Recording and managing data from our bioanalytical laboratory processes
- Managing and optimizing system interfaces
- Automating data compilations, primarily Excel-based
- Capturing internal and regulatory requirements to ensure compliance in software and processes
- Supporting the validation and quality assurance of data flow processes

What you bring

- Completed education in business, technology, or a related field
- Enthusiasm for working with software, data processes, and systems
- Advanced Excel skills, including macro programming
- Basic programming knowledge (a plus!)
- A proactive mindset and willingness to take initiative
- Team-oriented attitude and excellent collaboration skills
- Strong communication skills in both German and English

Job benefits

- Flexible working hours
- Comprehensive onboarding
- Team-oriented colleagues
- Fresh lunch served daily
- Attractive employee benefits (z.B. Jobrad, Optician, Online Yoga)
